

ACCELERATED START-UP CASE STUDY:

Advanced Planning and Close Collaboration
Reduces Risk and Saves Time

EARLY TROUBLESHOOTING OFFERS ENHANCED PREDICTABILITY & RELIABILITY:

- Javara/Sponsor innovative problem-solving at the outset paved the way for seamless progress
- Sponsor's 'Site-First Mindset' across entire project team bolstered partnership built on trust
- Small-group site meetings promoted effective candor, creativity, focused brainstorming

BEST-IN-CLASS SITE READINESS:

- Client-hosted F2F summit fostered early alignment to save time/resources later
- Early PI and staff involvement in project planning eliminated blind spots and helped raise patient awareness
- Patient-centered site readiness included staff sensitivity training and preparation for unique patient population (i.e. large size chairs, scales and bp cuffs, sensitive nomenclature, etc.)

COLLABORATIVE MODEL SAVES PRECIOUS TIME & RESOURCES:

- Master CTA and budget rate card negotiated ahead of final protocol to speed activation
- Group PSV for 10 sites across multiple states + virtual site tours saved precious CRA time/cost

RESULTS

Javara targeting 589 patients enrolled – supporting **28% of the patient population, across 10 sites**

Proactive patient engagement led to **>1000 interested** prospective participants

First patient screened **2 working days** after site activation

Formal pre-screening protocol with labs yielded qualified patient pool prior to green light

First patient enrolled in global trial
